

Partners

Luxford is fortunate to have a number of highly regarded strategic partners and suppliers as part of our team. Our partners range from key components suppliers to project management and automation systems providers through to distribution and specialist channel partners. We are constantly searching for new, innovative and leading-edge companies to add to our current list of strategic partners, in order to enhance our range of services and products and to provide the latest conveyor technology to all our clients.

Our partners form both a strong foundation for our products and services as well as a vital part of our efforts to provide world-class distribution and sales support systems. We are proud to have our partners as a key part of our team as we strive to offer the best value overhead conveyor products and services available anywhere in the world.

- **Wilkie Bros. Inc.**

Wilkie Bros. is our key partner and supplier of X-Series conveyor products including power trolleys, chain attachments, cat chains and refurbished free trolleys etc.

- **Blue Water Manufacturing**

Blue Water Manufacturing is our key partner supplier for both carbon and MicroTuff forged steel rivetless conveyor chain products.

- **Acco Systems Inc.**

Acco Systems Inc., part of the Durr group of companies, is a key supplier of overhead conveyor components and products around the globe. Luxford represents Acco Systems Inc. in Australia for all major new turnkey systems projects.

Distributors

- **Renold Australia Pty. Ltd.**

Renold Australia is our key distributor in Australia for X-Series overhead chain conveyor products.

- **E-Type Engineering Ltd.**

E-Type Engineering is our distributor and systems fabrication partner for the heavy engineering sector in New Zealand.

Overhead Conveyor Solutions

Spare Parts and Accessories

Maintenance and Service Programs

Luxford – First Choice for Overhead Conveyors

Luxford is Australia's leading specialist overhead conveyor manufacturer and components stockist.

We offer competitive overhead conveyor solutions, spare parts and accessories for a wide range of industry sectors. Luxford, as well as having our own range of overhead conveyors – the LT Series, offers clients a complete range of X-series rivetless overhead conveyor systems. We also offer a unique free trolley refurbishment system to automotive and aluminium smelting customers in Australia, New Zealand and Europe.

History

Luxford Pty. Ltd. was founded in 1992 after taking over the assets of the previously-operating Luxford Engineering. The Luxford name in Australia has been synonymous with the Luxford Pipe Trolley range since 1954 and the Luxford pipe trolley is still available today, and forms an integral part of our product range.

Luxford Pty. Ltd. is a privately owned business operating from a modern 12,000 square metre factory and office complex in the northern Melbourne suburb of Sunbury. In 1996 the business opened an office in the UK – Luxford Ltd, and now operates autonomously to service the needs of our growing list of clients in the UK and Europe.

Market Experience and Projects

Luxford has extensive experience in the aluminium smelting, automotive components, product finishing and general industrial market segments in Australia, New Zealand, the Middle East and in Europe.

Our largest projects have included significant X466 power and free replacement track project at a major aluminium smelter in Dubai as well as on-going and other significant works with major Australian smelter clients.

Our clients in Australia and Europe include major automobile producers, automotive components suppliers such as brake, suspension, seating and dashboard systems manufacturers, industrial equipment, spray painting and powder coating and abattoirs and animal hide and skins processors etc.

Services

As well as supplying leading and innovative overhead conveyor products, as detailed opposite, Luxford is able to provide clients with a range of other added-value services and programs.

These services include, full or partial installation, project management as well as break-down, routine and preventative maintenance regimes. All these services and programs come with the full support, back-up and warranty that you come to expect from the Luxford organisation.

Products

Luxford offers a range of high quality overhead conveyor systems, spare parts and related components for all industrial applications. These products include X-series overhead conveyor systems and components, the Luxford-designed LT Series light track conveyors and the Luxford Pipe Trolley range of components.

• LT-Series Overhead Conveyor Systems

Luxford has designed a unique range of high quality and affordable light track conveyor systems in both Power Only (LT 30) and Power & Free (LT 70) configurations.

These systems are ideal for handling unit loads up to 70 kg and with its unique design, the LT Series conveyor system can operate in confined spaces with minimal turning radii.

The LT Series conveyor system is ideal for the following applications:

- Product Finishing-Wet Spray, Powder Coating and Oven applications,
- Automotive Component Product Assembly and
- General Assembly and most Industrial applications.

• X-Series Overhead Conveyor Systems and Components

Luxford offers a complete range of X-Series (X348, 458, 466 and 678) overhead conveyor systems and components, whether it is a complete Power & Free or Power Only system or replacement components such as:

- Free trolleys (new and fully refurbished),
- Power trolleys,
- Chain (carbon and MicroTuff I5),
- Chain attachments, Caterpillar chains,
- Roller Turns, Drive and Take-Up units etc.

Refurbished Free Trolleys – Key Brands Available

We offer our clients a unique free trolley refurbishment program in which we can supply fully reconditioned or replacement free trolleys from manufacturers such as Acco, Jervis B. Webb, NKC, Allied Uniking and Daifuku etc.

• Luxford Pipe Trolleys

Luxford's extensive range of pipe trolleys have been an industry standard in Australia for over 50-years.

Luxford's range of pipe trolleys include the following configurations:

- Hand Pushed 1-1/2" pipe trolleys (aluminium body),
- AX Series pipe trolleys (steel body) with safe working loads from 50-750kg.

New Products

Luxford, with our network of partners and associates is continually searching the world for new conveyor solutions, products and innovations to bring to the market to help improve your productivity and manufacturing efficiency. Please refer to our website www.luxfordconveyor.com for constant updates on the latest technology and our range of new products that are available from Luxford.
